

The simple solution for Rooftop support

Miro Industries • www.miroind.com

Engineered Polycarbonate Pipe and Conduit Pillow Block Pipe Stands and Bases

MIRO Industries, Inc., pre-manufactures solutions for supporting rooftop pipe, conduit, duct, cable trays, walkways, crossovers and mechanical units that prevent damage to the roof membrane and effectively support a variety of loads and sizes. Since 1982 we have been providing the mechanical, roofing, and electrical industry with durable non-penetrating pipe supports.

MIRO has been widely accepted throughout the construction industry as a preferred system to wood blocks or penetrating the roof membrane in order to support rooftop pipe and other mechanical units. We have continued to use polycarbonate plastic, hot-dip galvanized steel, and stainless steel, which have proven to withstand the hard elements and ever-changing weather found on rooftops. Our wide variety of supports provide our customers and specifiers with a quality product at a competitive cost. With the ability to do the initial take-off, design, layout, and final installation, no other manufacturer in our industry can offer our breadth of products and services.

Products:

- Conduit Supports
- Pipe Supports
- Pipe Hangers
- Mechanical Supports
- Crossover and Walkway
- Accessories
- Duct and Cable Tray Supports
- RSS4 - Roof Top Sleeper Support
